

**Position:** Project Manager

**OIL AND GAS INDUSTRY**

**Location:** Namibia, Windhoek

**Key Responsibilities:**

- Lead the planning, execution, and delivery of international training projects.
- Manage cross-functional teams, ensuring efficient collaboration and project success.
- Oversee project budgets, schedules, and resource allocation.
- Implement new technologies and innovative solutions to enhance project outcomes.
- Ensure compliance with industry standards and regulations, particularly in firefighting and emergency response protocols.

**Qualifications & Requirements:**

- Proven experience in setting up and managing international training projects.
- Solid background in the oil and gas industry or technical field.
- Expertise in firefighting and emergency response management.
- Strong proficiency in the latest technologies relevant to project management and operational efficiency.
- Proactive leadership style, with the ability to inspire and direct teams in a high-pressure environment.
- Experience working in tense and demanding situations, demonstrating resilience and adaptability.

If you have a passion for excellence, a commitment to leading teams to success, and a desire to tackle the challenges of the oil and gas sector, we would love to hear from you.

Join us in shaping the future of the industry, driving innovation, and developing world-class training programs.
